For the Drum Kit Channel, there should be an admin toggle to add the word "FREE" at the beginning of YouTube titles. When off, the word isn't included; when on, it appears at the front of the title.

WE WILL HAVE 2 OPTIONS TO CONNECT TO THE SOFTWARE
1. **Beat Channel** → Beat Title format (description links to buy beats/licenses).
2. **Drum Kit Channel** → Drum Kit Title format (description links to buy kits/packs).

⚠️ Both channels upload the same type of **beat preview videos**, but the **titles + descriptions differ** depending on channel type.

Beat Channels - will sell actual beats
We can allocate different genres
Lofi Hip Hop (Hassan Channel 1)
Deep House (Andrius Rap)
Boom Bap Beats (Syed Beats)
Pop Beats

Drum Kit Channels we can allocate different genres
Lofi Hip Hop (Syed Beats)
Deep House
Boom Bap Beats
Pop Beats

One CTA will direct users to purchase beats, the other to purchase drum kits—while the generation process remains the same.

4. STEP BY STEP TEMPLATE TO GENERATE YOUTUBE VIDEO TITLE FOR 1. Beat Channel & 2. Drum Kit Channel:

🎯 {Genre} & {ProductLink}

1. {Genre}

- Determines the **style of description** the software will generate.

- Each channel is linked to a specific {Genre} (e.g., *Lofi Hip Hop*).

- All description templates, hashtags, and tone will adapt automatically to the selected {Genre}.

---

2. {ProductLink}

- A **direct link to the product page** associated with the chosen {Genre}.

- Example: if {Genre} = Lofi Hip Hop, then {ProductLink} = URL of the *Lofi Hip Hop Drum Kit* page.

- Always points to the correct kit/product that matches the genre in use.

- Must be **added into the software as a required field** for each genre.

- That way, when a user connects their channel to a genre, the {ProductLink} automatically injects the right URL into the generated YouTube description.

💡 Think of {ProductLink} as the "download link" for each genre's kits. Without it, the template isn't complete.
